

I am concerned about the deregulation vote coming on June 2 and would encourage a postponement of the decision to give people time to review the possible effects of the proposed rule change. My concern is that media will be concentrated in the hands of a small number of people and will cut down on the diversity of opinion available and end local programming. Media is too important to democracy to create a monopoly or near monopoly of the public airwaves. We need to make sure that it is the public not the commercial interests that are protected.
